

"Love Knows No Boundaries: Lewis and Maria's Modern Tale of Sending Cash Across Borders"

Once upon a time in the cold and cloudy city of Montreal, Canada, Lewis found himself deeply in love with Maria, who lived in the colorful and lively Punta Cana, Santo Domingo. Distance couldn't dim the flame of their affection, and Lewis, determined to express his love, decided to send Maria a monthly gift of \$100. The challenge, however, lay in the logistics of transferring money across borders.

In the traditional way, Lewis had been using Western Union, a reliable but cumbersome method. Every month, he faithfully sent \$100 to Maria, but the process was marred by a 10% charge, a combination of transfer fees and currency exchange. Maria ended up receiving \$90 in local currency. With no access to a bank account or credit card due to her modest income of \$150 per week, she had to face the arduous task of traveling 4 kilometers to reach the " OLÉ Super Mercado", where the closest Western Union agent was located to cashout this transaction.

This journey required Maria to spend approximately \$1.25 on transportation, taking 45 minutes to one hour of her precious time. Upon reaching the Western Union agent, she often found herself waiting in line for an additional 15 to 25 minutes. The frustration peaked when, after completing a tedious form, Maria had to be served by a cashier protected behind three layers of bulletproof glass, all to receive the transfer in local fiat currency minus 10\$, of the initial value.

But love, as they say, finds a way. Lewis discovered a modern solution to make their love story smoother and more delightful—SEND.IT.CASH.app With this innovative and disruptive app, Lewis and Maria's connection transcended borders, turning their monthly ritual into a seamless experience.

SEND.IT.CASH

Upon sending the same \$100 through the SEND.IT.CASH app, Maria received an instant notification of the secure peer-to-peer transfer, and the best part? No transfer or exchange fees! A simple press of the "Get Agent" button revealed a list of the five closest agents within a 5-kilometer radius of her home to choose from. Maria chose Jose 0457, an agent from her neighborhood with a 5-star rating, who was ready to deliver the cash right to her doorstep or at a convenient point fixed by them sometime.

Jose0543, the agent, efficient and reliable, arrived at Maria's doorstep in approximately 15 minutes even he had to stop on his way to deliver a previous client his hot and delicious Pizza from little caesars with his orange mobileta, ready to complete the exchange. Maria scanned Jose 0457's wallet and proceeded with the exchange. A nominal fee or suggested 3% fare for the agent was a small price to pay for the convenience and joy it brought to Maria's life. No more long journeys, no more frustrating waits, just a smooth and hassle-free experience, allowing Maria to enjoy more precious moments with Lewis.

And so, month after month, the SEND.IT.CASH app became the magical bridge that brought Lewis and Maria closer, proving that love, supported by innovation, could truly overcome any distance.
